I urge you to stop persecuting Bill Gates and Microsoft for being smart and able, and doing things to help all the world. It is ridiculous to spend taxpayer money to prosecute this company for antitrust activities. I use their software and also use software of competing companies which is fully compatible with Microsoft products.

Stop the mindset of punishing the smart people who do good. They do not owe anything to the less smart and less energetic. Everyone has choices--it is up to each one of us to exercise these choices in the best and most productive manner for us.

Make a choice NOW!
